

CHILD LIFE PROFESSIONAL CERTIFICATION EXAMINATION CONTENT OUTLINE

Revised 2014

The Child Life Professional Certification Examination is designed to test your understanding of the areas of knowledge and skills that experts in the child life profession deem essential to performing competently as a child life specialist. Like any specialty certification examination, this one does not presume to test all of your knowledge about the specialty. It samples the knowledge and skills a child life specialist needs to perform the tasks in each major area of responsibility, as defined through a practice analysis study. To receive certification, you must demonstrate mastery of the knowledge and skill areas in this defined scope of specialized practice, no matter what your particular current job responsibilities are.

The Child Life Professional Certification Examination consists of 150 multiple choice questions. Following is a listing of the domains and tasks specific to each area of child life practice, with a notation of the percentage of examination items related to each domain. For further information on the process that was used to determine the content of the examination you may purchase the *Study Guide for the Child Life Professional Certification Examination* through our online bookstore and review "How the Examination Was Developed."

DOMAIN	# QUESTIONS	% OF EXAM
I. Professional Responsibility	45	30%
II. Assessment	45	30%
III. Intervention	60	40%
